Haygood Drive Improvements

December 8, 2008

The project consists of the reconstruction of Haygood Drive between Ridgewood Drive and North Decatur Road. The intersection of Haygood Drive and North Decatur Road would be modified to increase sight distance and pedestrian safety. Bicycle lanes would be constructed along Haygood Drive, and traffic operations would be improved through construction of a dedicated southbound right turn lane. The relocation of Haygood Drive would also create an opportunity for increased green space in front of Druid Hills High School, and would increase storage area for school buses. The project, in conjunction with an adjacent future project to replace the Clifton Road bridge over CSX Railroad, would also provide an alternative route to access proposed Emory Healthcare facilities and would relieve traffic volume on Clifton Road.

You are welcome to provide your input regarding this project on this form. Comments may also be mailed within two weeks of this meeting to the address at the bottom of this page.
